

FINISH

Hygienic quartz surfaces

New Silestone benchtops have built-in Microban anti-bacterial protection to fight bacteria and mould.

Available from Parbury, Silestone leather finish countertop is said to offer an alternative to high polished surfaces, slightly textured with minimal surface reflection.

It is said to be the only countertop with built-in Microban anti-microbial product protection to fight the growth of odour-causing bacteria, mould and mildew on the product surface for the life of the product.

Microban inhibits the growth of potentially harmful bacteria such as salmonella, e-coli and listeria that can cause food poisoning.

Microban is built-in during the production process, being locked into the quartz structure of each Silestone worktop.

Because it is in-built, Microban cannot wear away or wash off, so the Silestone worktop is protected for the life of the product.

COATING

Slick showers

EnduroShield is a permanent, non-stick coating for all glass surfaces that makes grime, dirt and soap scum easier to clean.

Able to be used on all glass surfaces such as shower screens, windows, balustrading, mirrors and coloured glass splashbacks, EnduroShield is an ultra-thin, transparent coating that completely adheres to the glass surface, providing protection that will repel both water and oil-based stains.

It is easily applied to new or existing glass and is non-toxic. Each kit treats up to 8sq m.
