ENDUROSHIELD YOUR POOL ALSO FOR SHOWER SCREENS AND ALL GLASS SURFACES

EnduroShield-makes cleaning a breeze

After hours of cleaning your pool and spa its time to clean the glass surrounds...not anymore...EnduroShield makes cleaning a breeze...

It's time to dispose of all the harsh toxic chemicals you use and replace them with one product EnduroShield, it's a revolutionary, permanent, non stick coating for ALL glass surfaces which makes grime, dirt and soap scum easier to clean by up to 90%.

EnduroShield will not only improve the aesthetics of the surfaces you use it on, but the superior protection also helps prevent the build-up of mould and harmful bacteria, promoting a germ free environment. It will also save you countless hours scrubbing your glass and bathroom surfaces - a simple wipe over is all it takes.

Untreated glass is very porous and as a result it absorbs mineral deposits, soap scums, dirt and pollution making it very difficult to clean. Over time glass can discolour and etching can occur in harsh environments. Examples are glass exposed to salt spray from the ocean or salt-water pools, such as exterior windows and glass balustrading. Another common harsh environment is found in the household bathroom. The shower screen is subject to mineral deposits from the water, shampoo chemicals, body fats, and harsh scrubbing using toxic cleaners.

Major benefits includes:

- Protects against staining from saltwater being splashed onto the glass.
- Glass is much easier to clean as it has a non-stick coating, so dirt, grime and bird droppings are easily removed.
- Cleaning is as easy as washing with a sponge and squeegeeing down to remove the water drops to leave a crystal clean finish.

EnduroShield is an ultra-thin transparent coating that completely adheres to the glass surface and provides protection that will repel both water and oil based stains. Similar to a non-stick fry pan, cleaning is made easier using only water and a mild detergent or with a microfibre mitt such as a Sabco OneWipe.

EnduroShield is easy to use it dries in minutes, enhances and protects instantly,

its tough with no yellowing of glass, the clear moisture-resistant finish has to be seen to be believed.

EnduroShield can be used on all glass surfaces such as shower screens, windows, balustrading, coloured glass splashbacks,

mirrors, glass roofs, glass tables and even car windscreens.

Extensive testing has been carried out to determine the durability and longevity of the protective coating. EnduroShield passed 5000 wash cycles with minimal loss performance. The figure of 5000 cycles is equivalent to washing EnduroShield once per week for fifty weeks per year, for ten years.

EnduroShield is easily applied to new or existing glass and is non-toxic. Available in a convenient Do-It-Yourself kit, the kit has everything you need to treat up to 8 square meters or the inside of two shower screens. In the kit is a pre cleaner and fine steel wool to remove any build up of soap scum, dirt and grime. Once the glass is clean apply the EnduroShield solution by spraying a liberal amount on the glass and spreading it evenly across the surface with the cloth provided. The kit contains simple easy to read instructions and comes complete with a 3-year guarantee for peace of mind. Visit www.enduroshieldonline.com to view an application video and see just how easy EnduroShield is to apply.

The D.I.Y kit retails for \$59.95 and is exceptional value when you think of all the money you will save from harsh toxic cleaners, let alone the time saved making your life that much easier! It is available at all good bathroom, and shower screen retailers.

EnduroShield can even be purchased as an optional extra on your new shower screen or glass balustrade direct from the retailer, and comes complete with a 10-year warranty. This will ensure that your new glass remains stain free for many years to come.

EnduroShield is proudly made and owned in Australia. Call 02 9639 7167 or visit www.enduroshieldonline.com for more information.
