

CLEANER GLASS WITHOUT THE EFFORT

GLASS fences are becoming increasingly common around pools boasting a view. Here is a product that will make cleaning a breeze.

EnduroShield is claimed to be a revolutionary, permanent, non-stick coating for all glass surfaces, making grime, dirt and soap scum easier to clean by up to 90%.

Clean glass will improve the aesthetics of the poolside area, and EnduroShield offers superior protection to prevent the build-up of mould and harmful bacteria, promoting a germ free environment. It will also save hours scrubbing the glass – a simple wipe over is all it takes.

Untreated glass is very porous and as a result it absorbs mineral deposits, dirt and pollution, making it very difficult to clean. Over time, glass can discolour and etching can occur in harsh environments, such as glass exposed to salt spray or salt-water pools.

EnduroShield is an ultra-thin transparent coating that completely adheres to the glass surface and provides

protection that will repel both water- and oil-based stains. Similar to a non-stick fry pan, cleaning is made easier using only water and a mild detergent or a microfibre mitt such as a Sabco OneWipe.

Extensive testing has been carried out to determine the durability and longevity of the protective coating: and EnduroShield passed 5000 wash cycles with minimal loss of performance.

EnduroShield is easily applied and comes in a convenient Do-It-Yourself kit, which treats up to 8m². The kit includes a pre-cleaner and fine steel wool to remove any build up of soap scum, dirt and grime. Once the glass is clean apply the EnduroShield solution by spraying a liberal amount on the glass and spreading it evenly across the surface with the cloth provided.

The DIY kit retails for \$59.95 comes with a 3-year guarantee. EnduroShield is proudly made in Australia and is Australian-owned. Call 02 9639 7167 or visit www.enduroshieldonline.com for more information.

NEW IMPROVED

**THE AQUAMAID™
CHECK & BALL VALVE**

The Aquamaid Check Valve and Ball Valve are for use in swimming pools, spas, solar heating systems, irrigation and other industrial applications.

BENEFITS:

- Positive Seal/Prevents Backflow
- Low Friction Loss
- No Corrosion
- Fully Serviceable
- Ball & Check Valve Interchangeable
- Australian Made
