## Maintaining shower screens

EnduroShield is a permanent, non-stick coating for all glass surfaces which makes grime, dirt and soap scum easier to clean by up to 90%. The protection provided by EnduroShield also helps prevent the build-up of mould and bacteria, promoting a germ free environment. EnduroShield can be used on all glass surfaces such as shower screens, windows, balustrades, coloured glass splashbacks, mirrors, glass roofs, glass tables, and car windscreens.

The DIY kit retails for \$59.95 and can be purchased as an optional extra on your new shower screen or glass balustrade direct from the retailer.

## Maria above counter basin

The Maria Above Counter Basin, new to the collection from Bathroom and Kitchen Supplies (Melbourne), introduces a contemporary element to any bathroom. The rectangular shape is complemented by the sloping internal shape, which offers an alternative to the standard basin.

Incorporating superior craftsmanship from the design team at Imperial Ware, the comprehensive range of basins includes a collection of wall basins, semi recessed basins, counter top basins and vanity basins. Available in white with no tap holes, the Maria basin is suitable for bench top mounting only.

## Breaking up is easy to do

Breaking up rock or concrete around the home can often be done without the cost and hassle of bringing in a jackhammer powered by an air compressor. A much easier option is to hire an electric jackhammer, which runs off normal household power. Kenards Hire has several models, along with a range of attachments such as points, chisels and clay spades, to suit all sorts of jobs.

The biggest electric breaker weighing 33kg can be used on concrete up to 100mm thick, as well as for rock excavation or digging up bitumen and clay. A medium size demolition hammer, weighing 15kg, will break concrete up to 75mm thick, excavate light rock and dig up bitumen and clay. A 10kg hammer, which is light enough to be used horizontally, is suitable for light demolition of bricks, rock breaking and excavation.
